"This is a real request"
framing R+
"This is a simulation"
framing R−
"You are being watched"
framing W±
+ the same task
Alpaca / AdvBench / OR-Bench
Language model
residual stream h
~10 late attention heads
write the framing signal
"real" direction
diff-in-means, last token
"watched" direction
diff-in-means, last token
Behaviour
comply / answer / refuse
Tests: decode (AUROC) · steer h + αg·d̂ · ablate h − (h·d̂)d̂ · attribute heads · knock out / patch heads · 2×2 factorial
